The prospects for a strong recovery appear good, although rising bond yields and harbingers of inflation have at times rattled the markets. All eyes will be on Washington as the new administration and Fed chart the course of the country's future growth. This panel will examine the consequences of proposed fiscal policies, including potential tax hikes and infrastructure spending, along with the role of monetary policy. How will the Fed sustain the recovery without overheating the economy? What will be the long-term effects of the unprecedented stimulus spending? How will frictions within the Democratic and Republican parties influence the debate over these important issues? Please join our experts for what will surely prove to be a timely and engaging discussion.*
3:30 pm ET – 4:15 pm ET	International & Emerging Markets Equity Investing- Podium Changes, Valuation Gaps & Compelling Opportunities	**Moderator:** Sean McCoy **Speakers:** Alex Farquhar, Ellwood Joel Baker, Highland Assoc. Britt Vriesman, RVK Lauren Mathias, Callan	*Once in a lifetime structural changes and decades-long market dislocations are giving investors much to think about in terms of future equity allocations globally. While economies were impacted by the pandemic worldwide, individual country recovery remains highly idiosyncratic. According to the IMF, China has now displaced the U.S. to become the world's largest economy, and its weighting in many indices is rapidly increasing. This is making it much more challenging for investors to avoid or control their exposure to China. Meanwhile, international markets are trading at their widest discount to the US at any point in the last 20 years. The surging tech sector and stock concentration in the U.S. indices, coupled with any dollar weakness, might be important relative considerations as some of the world's most compelling investment opportunities in consumer staples, consumer discretionary and industrials are arguably found abroad. Our panel will*

			debate whether allocators are currently approaching their international exposures differently.
